SUMMARY

Full-stack software engineer with 10+ years building and scaling web applications and cloud services across digital publishing, healthcare, and fintech. Delivers frontend experiences and backend APIs using TypeScript, React/Vue, Node.js/NestJS, and Java/Spring Boot, with end-to-end ownership of architecture, performance, reliability, and AI-powered features.

SKILLS

Languages: TypeScript, JavaScript, Java, SQL, Python, Scala
Frontend: React, Vue 3, AngularJS, HTML, CSS
Backend & APIs: Node.js, NestJS, Spring Boot, GraphQL, REST APIs, microservices
Databases & Streaming: PostgreSQL, MySQL, MongoDB, Redis, Azure Databricks, Azure Event Hubs
Cloud, DevOps & Testing: AWS, Azure, Docker, Kubernetes, Git, GitLab CI/CD, Jenkins, Playwright
Applied AI & Tools: OpenAI API, Amazon Rekognition, RAG, vector search, Claude, GitHub Copilot

EXPERIENCE

People Inc. (formerly Dotdash Meredith)

Remote

Senior Software Engineer

May 2023 - November 2026

- Delivered 100+ Vue 3/TypeScript CMS features and fixes supporting thousands of editors at a publisher with 40+ brands and 175M+ monthly consumers company-wide.
- Owned full-stack editorial workflows for scheduling, previews, URL routing, permissions, and reusable components, partnering with product and UX from requirements through release.
- Helped architect a greenfield workflow platform from alpha to beta, building GraphQL APIs, versioned workflows, dynamic forms, and payload validation.
- Reduced GraphQL API response times by 50%+ by optimizing queries and Node.js/NestJS services backed by MongoDB.
- Integrated Amazon Rekognition and OpenAI into production image workflows for celebrity identification and brand-aware alt-text generation from product filenames.
- Prototyped an editorial scheduling dashboard during an AI-assisted development sprint, surfacing publication conflicts and enabling in-app rescheduling.
- Upgraded frameworks and packages across four applications and extracted shared workflow integrations into a reusable, versioned client library.
- Supported 24/7 on-call operations, diagnosing and resolving production incidents across high-traffic publishing applications; implemented Elastic APM monitoring across nearly all platform applications to improve performance visibility and troubleshooting.

UPMC Enterprises

Remote

Senior Software Engineer

September 2021 - April 2023

- Built Java/Spring Boot services and PostgreSQL-backed EHR data pipelines on AWS with Docker and GitLab CI/CD, automating healthcare data delivery.
- Designed a reusable Java batch framework with scheduling, monitoring, logging, and secure file handling for cloud and on-premises processing.
- Engineered Scala-based pipelines in Azure Databricks to consume and filter Event Hubs streams, route events through an internal Event Hub, and deliver processed data to third-party systems.
- Developed a React/TypeScript/Python RAG application using vector search and dynamic model selection for context-aware medical information retrieval.
- Strengthened production security and usability through OWASP scanning, critical CVE remediation, WCAG accessibility improvements, and incident support.

Vincent Payment Solutions

Remote

Intermediate Software Engineer

August 2017 - September 2021

- Built a secure multi-tenant payments platform with Java, AngularJS, MySQL, and OAuth, supporting disbursements across research, education, and athletics.
- Mentored junior engineers, conducted code reviews, optimized production MySQL queries and stored procedures, and automated deployments using Jenkins CI/CD.

Branding Brand

Pittsburgh, PA

Software Developer

April 2016 - August 2017

- Built mobile-first Node.js e-commerce applications and resolved high-priority production incidents across a 100+ client portfolio.

Rivers Agile Solutions

Canonsburg, PA

Software Developer

October 2015 - April 2016

- Modernized desktop web applications into responsive experiences, resolving cross-browser compatibility and usability issues.

UPMC Technology Development Center

Pittsburgh, PA

Associate Software Developer

May 2014 - October 2015

- Delivered UI and navigation improvements for MyUPMC, a high-traffic healthcare patient portal.

EDUCATION

Bachelor of Science in Computer Science

Pittsburgh, PA

University of Pittsburgh

2011 - 2014
